Allowable Subject Matter

Claims 1-14 and 21-33 are allowed.

The following is an examiner's statement of reasons for allowance:

As to claims 1, 5, 6, and 9 the prior art of record, taken alone or in combination, fails to disclose or render obvious a method of determining a spectrum for a light source to be used in a projection system comprising calculating color coordinates for the light after being sent through red, green, and blue filters and comparing these calculated color coordinates to desired (i.e. reference) corresponding color coordinates and reducing differences between the two sets of color coordinates to achieve a target spectrum for the source, in combination with the rest of the limitations of claims 1, 5, 6, and 9.

As to claim 21, the prior art of record, taken alone or in combinations, fails to disclose or render obvious a method comprising determining wavelength cutoffs for blue, green, and red filters, sending light from a source through said filters to create subsequent spectra, calculating color coordinates from said spectra, and comparing said calculated color coordinates to a set of desired color coordinates to find differences, and reducing the differences by adjusting at least one of the source or the filter wavelength cutoffs, in combination with the rest of the limitations of claim 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
